Teachers Health Trust Performance Plus Plan Updates

par8o & Population Health Management

The WellHealth par8o referral management software has now partnered with the WellHealth Here's to Health Population Health Management (PHM) programs to allow for an easier and more streamlined enrollment process.

The following programs are available for patients with any of the correlating diagnoses and/or pre-diagnoses. Primary care providers will need to work with their staff to identify members needing to be referred into these programs.

Program Name	Pre-Diagnoses	Disease State	Specialization
Control is the Goal	Pre-Diabetes, Obesity	Diabetes	Endocrinology
Have a Heart	Hypertension, Hyperlipidemia	Congestive Heart Failure	Cardiology
Breathe Easy	Asthma / Allergies	COPD / Asthma / Emphysema	Pulmonology / Allergy
My Best Pregnancy	Advanced Maternal Age	High-Risk Pregnancy*	Perinatology / OB/GYN

* All high-risk pregnancy patients will also require prior authorization and assessment by the PHM Clinical team

When referring patients into one of the above PHM programs, the staff member who is trained and has access to the par8o system for your practice will simply select **POPULATION HEALTH** from the specialty drop down options for the Trust Performance Plus Plan. All provider information will be the same as if sending a normal referral. When listing the reason for referral, please include the patient's pre-diagnosis and/or diagnoses and ICD-10 code. Then you will be able to select one of the four programs mentioned above under recommended providers in the care compass.

Once you have selected the corresponding program, simply send the referral and a member of the WellHealth PHM Clinical team will reach out to the member within 48 hours (two business days).

For more information regarding the PHM programs and/or your role in assisting patients in enrolling and managing their chronic illnesses, please contact **Tina Phyfer, Director of Population Health Management**, at **(702) 794 0872, ext. 2760**.

Rx Savings Solutions

The Trust has partnered with a new prescription savings program called Rx Savings Solutions. The program works with the Trust's claim system to identify lower cost medications for patients.

In the coming weeks, Rx Savings Solutions will be working with the WellHealth Network Relations team to schedule in-office visits with our network providers in order to properly introduce you and your staff to the program, as well as present educational materials regarding patient engagement and proper utilization of the tool.

For more questions regarding the Rx Savings tool and/or to schedule your in-office training, please call **(702) 728-5880** or email networkrelations@wellhealthqc.com.

Happy Holidays!

The Teachers Health Trust, WellHealth Quality Care, and TRISTAR would like to extend a Happy Holidays to you. We can not do what we do without each of you. Have a happy, safe, and fun holiday. See you in 2017!
